THERE was a senseless clamor in this country for "cheap" things. Well, we've got 'em—cheap wheat, cheap clothing, cheap workingmen. How do you like the cheapness? A few more moves in the same direction and the United States will be as cheap a country achieve which is a striking object lessing.

\$65,000,000. By the aid of a \$50,000,000 —MAYSVILLE—bond gold loan, and the premiums of Manufacturing Company \$8,000,000 on that loan, the reserve was again restored above its legal limit of \$100,000,000.

Last month, July 23d, the gold reserve had again fallen to \$60,375,695. Deducting therefrom the \$50,000,000 gold loan and the \$8,000,000 of premiums on the loan, we would have only \$2,375,695 remaining as the balance of the Treasury's gold reserve to maintain the credit of the country after less than eighteen months of a Democratic Administration that has threatened the country with Free-trade. Thus:

National Gold Reserve.
January 31st, 1993......\$108,000,000 

Balance without loan....\$ 2,375,965
No account has been here taken of the \$10,000,000 in gold secured from New York bankers last month by a trans-fer of funds in order to relieve the Treasfer of tunds in order to relieve the Treasury gold fund. Without this \$10,000,000 and without the loan the gold reserve would have been completely wiped out of extenses, and there would have been a deficiency of \$7,824,005 in meeting the demands for gold that have actually been made upon the freasury with nor a dollar of gold security left for the payment of Treasury gold notes.

This is the result of less than eighteen months of a Democratic Administration and the fear of Freatman.

ABOUT the only things that have no been cheapened by the threat of Free trade are the Democratic statesmen in Congress and GROVER'S salary.

OUR learned friend of The Bulletin day or so since had something to say about the decline of prices for wheat during the last year of the late Republi-can Administration.

Come to think of it, that is a meaty

subject.

Under Republican Administrations from 1860 to 1884, wheat commanded the average highest price ever known in this country, reaching \$2 85 a bushel in

In October, 1883, just a month before Mr. CLEVELAND'S first election, it was quoted at \$1 13\frac{1}{2} cents per bushel.

In December, 1884, nine months after

CLEVELAND went into office, it was down to 96 cents, and that was the highest point it reached during his

whole term, going as low as 69% cents. In 1888 Mr. Harrison was elected, and during 1889-90-91 wheat ranged from \$1 08# to \$1 16.

In October, 1892, a month prior to CLEVELAND'S last election, it was down to 91% cents, and in July, 1893, under

CLEVELAND, it was quoted at 88 cents. In this year of grace and GROVER, A. D. 1894, it is worth in Maysville from 35 to 45 cents per bushel!—and that in spite of the fact that the Editor of The Bulletin howled himself hoarse with the battle-cry, "Vote for CLEVELAND and get \$1 25 for your wheat!"

Ask us something else, neighbor.

The Tennessee Supreme Court has impached Judge John B. Talley, of the Ninth Judicial Circuit, for complicity in the killing of Robert C. Ross, who ruined the former's sister-in-law. The trial attracted much attention throughout the state. Judge Talley's participation in the crime consisted in sending a telegram prevening a warning from being delivered to Ross. Talley, as a result of the decision, will have to stand trial on the charge of murder in the first degree.

you like the cheapness? A few more mores in the same direction and the United States will be as cheap a country as China, which is a striking object lesson of what cheap things means.

CHEAP flour means cheap wheat; cheap wheat means the farmer's loss; the farmer's loss means his inability to buy from the merchant, and this in turn means the withholding of the merchant's order to the manufacturer. This coloes the factory and throws its operatives out of employment. And this means want and hunger. How do you like the cheap demagogy of cheap things?

JUST before the country passed into control of the present Administration, January 31st, 1863, the gold reserve in the National Freature.

SHERMAN'S VIEWS.

The Ohio Senator Believes Political Parties Should Decider For a Yardi Commission. Senator Decider For a Yardi Commission. The Commission of the Commission

perhaps overthrow the work of a tariff commission, as they did in the case of the Oliver commission." Senator Sherman was asked.

"That is precisely the danger to guard against," said he. "Some device must be hit upon which shall make the work of a commission final. My notion is that this can be done in one way in the control of the c

will give to our people a tariff law which will satisfy the country, for many years.

"If a fair, honest bill is made levying an average rate of duty of about 35 per cent.—except upon some of the luxuries where it might be 50 per cent. or more, and making the duties specific when practicable—it will receive the and business will quickly adjust itself to it, and there will be no more periods of uncertainty, for public sentiment will be strongly opposed to any further changes in the tariff law.

"The Olliver commission prepared an excellent tariff bill but congress destroyed it. I think it will be an easy consideration of the country is one given such a law, I am sure it will not tolerate any considerable alterations int. We shall have a welcome and much needed period of freedom from change and heated discussion of this subject, and business will respond favorably and quickly to the new conditions."
